

IN THE CLAIMS:

The claims have not been amended, and are set forth here in full for the Examiner's convenience.

1 and 2. (Cancelled)

3. (Previously Presented) A cell culture substrate having at least one area for culturing a cell on a substrate, wherein the culturing area comprises an area for holding a biologically active substance having a biological activity to the cell and an area for immobilizing a biologically active substance having a biological activity to the cell, and wherein the biologically active substance in the holding area is held in such a manner that it is released in a culture liquid when coming in contact with the culture liquid.

4 and 5. (Cancelled)

6. (Previously Presented) A cell culture substrate having at least one area for culturing a cell on a substrate, wherein the culturing area comprises an area for holding a biologically active substance having a biological activity to the cell and an area for immobilizing a biologically active substance having a biological activity to the cell, wherein the holding area includes a combination of areas different in a density of the biologically active substance in the holding area, and the immobilizing area includes a combination of areas different in a density of the biologically active substance in the immobilizing area.

7 to 11. (Cancelled)

12. (Previously Presented) A cell culture substrate having at least one area for culturing a cell on a substrate, wherein the culturing area comprises an area for holding a biologically active substance having a biological activity to the cell and an area for immobilizing a biologically active substance having a biological activity to the cell, and wherein the biologically active substance in the holding area can be control-released or a biologically active substance having a control-release property can be liberated from the holding area.

13 to 25. (Cancelled)
